

The Plan Collection Begins Offering Free Ground Shipping on All House Plan Orders

–Greatly increases number of house plans available via email for same day delivery–

STAMFORD, CT– (October 1, 2012) –The Plan Collection (TPC), the leading online house plan provider, announced today that free ground shipping will be offered on all house plan orders, while also greatly increasing the number of house plans available via email for same day delivery.

Builders and consumers alike need access to proven architects and /or house designers and their plans because not everyone has access to or can afford top top-notch architects. TPC plans are more affordable than custom plans, and since people's personal tastes vary, pre-drawn plans offer something for almost everyone. Popular [house plans](#) include Feng Shui, walk-in closets, island kitchens, luxury bathrooms and master bedroom suites. The plans offer many of the most popular features by demanding home builders.

Typical house plans include the following:

Floor Plans – a detailed floor plan layout on blueprints is basically an overhead view of each floor of the completed house. Walls are drawn in parallel lines scaled to indicate proper width while locations of fixtures and notes often specify more details such as finishes and construction methods.

Foundation Plan - a slab, crawlspace, full basement, or walk-out basement depending on the design. The plan delineates the location of the structural elements required to support the loads of the upper floors.

Exterior Elevations - a non-perspective view of the home drawn to scale so that measurements can be taken for aspects including front, rear and both side elevations. Elevations to be drawn at one quarter and one eighth inch scale.

Kitchen and Bath Elevations - show the arrangement and size of cabinets and fixtures giving basic information that can be used to create customized layouts with a cabinet manufacturer.

Electrical Layout - shows locations of light fixtures, fans, outlets, light switches and includes a legend on the page which explains the symbols.

The plan will also include cross sections and more details to other structural elements.

About The Plan Collection (www.theplancollection.com)

The Plan Collection is driven by the simple idea that great house design should be affordable and readily accessible to everyone. The company provides homeowners, prospective homeowners and builders with more than 20,000 house plans selected from the nation's leading designers and architects along with tens of thousands of instructional images and inspirational photos.

From the days of printed house plan books to PCs, the Internet, social media, and now tablets – [The Plan Collection \(TPC\)](#) and its founders have been dedicated to providing users with a better, more convenient and more valuable home building experience. Customers enjoy the benefits of a broad selection of high quality home plans and detailed how-to information, an easy-to-search site and knowledgeable customer service. TPC understands what homeowners are looking for, and delivers better search results to its users. As a result, thousands of houses have been built at a lower cost using pre-drawn house plans that meet homeowners' specific needs and desires.
